Beware of Ointments for Catarrh that contains Mercury.

As mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, and acts directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Sold by druggists, price 75c per bottle.

The Court Wrestles With Their Jail Controversy—The Matter in a Considerable Wind.

Quite a lively discussion got up in the county court last Monday when the question of building the new jail came up for consideration. There were but two firms on the ground offering bids on the jail, Messrs. McDonald Bros., of Louisville, and Mr. Landrum, representing the Pauly Jail Building and Manufacturing Company, of St. Louis. The latter firm are steel jail builders, and could not get in a competing bid with McDonald Bros., they claimed, because they were informed by the jail committee appointed by the court to let the contract, that their orders were confined to the building of a stone jail. It seemed that the first intention of the court was to build a stone jail, as a reference to the orders in respect to the matter made last November will show. The first step taken then was the appointing of a committee consisting of Messrs. G. W. Beard, Matthias Miller, D. H. Severs and Morris Eskridge, who were directed to report the kind of a jail they deemed necessary, and the probable cost of same. This committee conferred with Mr. McDonald, who was here, and who had previously exhibited to the court his plans for a stone jail, and the committee subsequently recommended the building of a stone jail with eight cells and jailer's residence attached. The report of the committee sets out the plan, specifications, etc., and in rather too voluminous to reproduce here; but it recommended that a stone jail was the character of structure desired.

The court adopted the committee's report and ordered them to advertise for bids for building a stone jail without reference to any other character of building. When the committee had advertised for bids the Pauly Jail Works, of St. Louis, sent their agent here to put in a bid; but when he got here and went before the committee, it appears that they could not consistently entertain his bid from the fact that under previous action by the court they were to contract for a jail to be built of stone.

The committee then recognized the hampered situation in which they were placed, but followed instructions. Their report Monday was a lengthy one, and showed that they had contracted with McDonald Bros. for a stone jail, to cost \$11,725. When the report was read and submitted for the court's rejection or approval, Mr. Landrum arose and said he had been on the ground of the stone jail builders. Mr. Landrum asked the court to set aside their action heretofore in regard to directing their jail to be built of stone and allow the jail building in the country to lay in bids. He claimed that he could build one of steel at a saving of seventeen hundred dollars less to the county than the price contracted with McDonald Bros. Mr. Landrum's remarks brought forth various opinions, and the matter seemed to take on an endless discussion at one time. Mr. McDonald was holding up his side of the case with a strong argument for fairness and candor with the committee, and contended that stone jails were equal to any in the world for durability and safety. He said his prices were reasonable, and he was only asking a fair profit on his work.

But there was a disposition on the part of many to believe after hearing the statements of all concerned, that the court had gotten themselves into a pretty close tangle by confining the contract to a stone jail and then giving McDonald Bros. an undue advantage in the bidding. Notwithstanding McDonald's fairness and honesty for construction, etc., the mistake was in not making the bids so as to entitle all competitors. This was the sole question agitating the mind of the court when they adjourned Monday evening 5 o'clock, having wrestled with it the best part of the day without any final action.
